Analyzing Container Behavior with  
Falco

### Analyzing Container Behavior with Falco

- Falco can be used in multiple ways.
  - Execute as a Background Process.
  - Execute as Web-Server.
  - Execute using CLI.
- User can run Falco using CLI using **falco** command.
- Use **-r <file>** to supply a custom rules file.
- Use **-M <Seconds>** to run falco for a Set number of seconds.
  - ***`falco -r my_rules.yml -M 120`***

### Falco Rules

- **Falco** Rule is a defined set of Conditions, which will trigger an Alert. Rules can be defined in a YAML file.

# Thank You...

Don't be the Same! Be Better!!!
