# CKS : Complete Certification Guide

Using AppArmor in k8s Containers

### AppArmor

- An AppArmor profile can be stored in a file and applied using the **apparmor\_parser** command.

```
sudo apparmor_parser /path/to/file
```

- By default, the command will load the profile in **enforce mode**. Use the **-C** flag for complain mode.

# Thank You...

Don't be the Same! Be Better!!!
