
CKS : Complete Certification Guide

Setting up Audit Logging

Enable Audit Logging

- User can **Enable Audit Logging** by passing flag to kube-apiserver.
 - `--audit-policy-file` - Points to the Audit Policy Config file.
 - `--audit-log-path` - Location of log output file.
 - `--audit-log-maxage` - Number of days to keep old audit log file.
 - `--audit-log-maxbackup` - Number of old log files to keep.

Thank You...
