# CKS : Complete Certification Guide

Keeping k8s Updated

### Upgrade K8s Cluster

- If attacker find some vulnerabilities in older K8s version and that is your deployed version, attacker may attack your K8s Cluster.
- Keeping K8s cluster upto date is important when it comes to security. Update your K8s cluster regularly.

## K8s : Certification

### Upgrade K8s Cluster

- **Minor and Patch Versions** : Minor versions are regularly patched. These patches often keep Bug Fixes or Security fixes.
- **Patch Support Period** : Latest three minor versions receive patch support. Minor versions received patches for Approximately One Year.
- **Security Patch BackPort** : Security patches are usually backported to active minor versions, but not always. It is best to your cluster upto date.

# Thank You...

Don't be the Same! Be Better!!!
